Item #25 - Right Handed Mathews Vertex Compound Bow

Mathews Vertex Hunting Bow

Website: [Vertex](#) | [Mathews Archery](#) | [Mathews VERTIX](#) | [Mathews Archery \(mathewsinc.com\)](#)

Up for auction is a new in the box right-handed Mathews Vertex compound bow in Sitka Gear's popular Elevated 2 camouflage pattern. This state-of-the-art bow is currently set at 70 pounds of draw weight with 80% let off and has a 28-inch draw length, but those are both easily changed with simply changing the modules. The Mathew's Archery website says it best,

"The VERTIX is the peak of versatility and performance. Switchweight modules allow you to change peak draw weight in 5 pound increments. Available in 60, 65, 70 and 75 pound peak weights, each set of mods are programmed for an incredibly smooth draw. The new Engage Grip interface was designed to ensure consistent hand placement, reducing torque and increasing accuracy. While more versatile than ever, silence and efficiency remain king, and with 20% less vibration than the TRIAX (its predecessor), the VERTIX delivers an experience that is both unexpected and unforgettable."

We love this auction item. This is an advanced level bow, but because of the quality, ergonomics, and technology used in the design and engineering at Mathew's Archery, even a beginner would shoot it well and enjoy it. We would like to thank the sponsors for their very generous gift to the chapter valued at **\$1,049.99**
